Notice of Filing

Job Title: Data Engineer

Job Duties: Design, build, and launch ETL data pipelines to move data across systems and build the next generation of data tools that generate business insights for a product. Analyze user needs and software requirements to determine workability and to offer support for end users on data usage. Design, architect, and develop software and data solutions that help product and business teams make data-driven decisions. Leverage homegrown extract, transform, and load (ETL) framework as well as off-the-shelf ETL tools, as appropriate. Build and extend cross platform ETL and reports generation framework using Python. Develop the ETL code to migrate legacy databases into target databases. Develop reports using Tableau to drive business decisions. Rethink and influence strategy and roadmap for building efficient data solutions and scalable data warehouse plans. Design, develop, test, and launch new data models and processes into production, and provide support. Identify data infrastructure issues and drive to resolution. Will work in Pleasanton, CA and/or various client sites throughout the U.S. Must be willing to travel and/or relocate.

Salary: $125,000/year

Employer: Aroha Technologies Inc

Work Location: 5000 Hopyard Road, Suite 415, Pleasanton, CA and/or various client sites throughout the U.S.

Apply to: Aroha Technologies Inc, 5000 Hopyard Road, Suite 415, Pleasanton, CA 94588
